A REAL ESTATE CRYPTO

## **MESSAGE FOR OUR CLIENTS**

As I look ahead I am excited and proud about the progress that AWA COIN LLC has made after crossing a decade. As the Managing Director of AWA COIN LLC , I take commitment to make sure that every Client and customers receives an outstanding Service from AWA COIN LLC . I would like to thank all our clients, customers, staffs and well wishers for supporting and guiding.

We bring to our clients much wanted human values, integrity, trust and an assurance of responsibility all coupled with our expertise in construction, & management. Our biggest assets have always been our small but highly trained team of professional managers and engineers who are backed by a very able team of administrators.

We have a clear vision about building on our strengths and our achievements while holding dear to us our basic principles.

I am confident that with our versatile, adaptable and technology led efforts, we will meet the exacting standards of our clients.

## **STATEMENT OF PURPOSE & WARNING**

The purpose of this document is to introduce to its readers the AWA COIN LLC platform & the AWA token as a platform that rewards customer engagement with tokens of appreciation, while offering a marketplace for the redemption, exchange and trading of such tokens. The information in this document is sensitive and will be used for aforementioned purpose only. This document is not for public use, public distribution, copying or public consideration.

## **DISCLAIMER**

Certain section of this document discusses the future roadmaps, limitations, future earnings, strategies etc of the AWA COIN platform. All statements that are not purely historical and constitute “future looking statements” within the meaning of the “Private Securities Litigation Reform Act of 1995” [1] . Such forward-looking statements are subject to risks and uncertainties. The actual results in which case may be different than the anticipated results. The aforementioned statements are based on the beliefs and assumptions of the Company at the time of writing this document. The use of the following word or variations of such words and expressions similar to, “anticipate,” “intend,” “estimate,” “believe,” “expect,” “should,” “potential,” “forecast,” “project,” are intended to identify forward-looking statements. AWA COIN LLC undertakes no obligation to publicly update or revise any forward looking statements. Users of this document are cautioned not to place undue reliance on these forward-looking statements in making any personal decision.

## VISION OF AWA COIN LLC

The vision of AWA COIN LLC is actionable, purpose-led ideal that has a real and significant bearing on our deliveries and our conduct. We are committed to ensuring that our offerings are revolutionary, ahead of the times, benchmarked against best global trends & practices and built around our discerning customers' needs. We ensure that the ecosystem we operate in, the society around and all people who experience, engage or align with any aspect of the spaces we create, travel we offer, retail we deal in, news we spread, water we provide , etc. truly feel the differentiation and positive impact on quality of life.

In line with AWA COIN LLC 's vision, AWA COIN will offer the following -

- A utility token that can be used across all commercial platforms, merchant sites and marketplaces both online and offline. Holders of AWA token should be able to utilize this token to buy everything from luxury to their basic needs.
- A token that will be redeemable in real estate in India at prices which are much lesser than the market. Holders of this token would not have to worry about having to live or work in rented properties.
- A token that will earn its investors regular dividends through investments in crypto Guarantee Funds and other popular Indices.

## **OBJECTIVE OF AWA COIN LLC**

Apart from empowering its users with consumer power and real estate redemption power, AWA COIN LLC aims to build a portfolio by applying principles of investment that will manage the risk by diversifying investments in order to reduce the market volatility thereby safeguarding and providing maximum returns on the investor's investments.

Empowering Users with  
Consumer and Real Estate  
Redemption Power.

Building a Diversified  
Investment Portfolio.

Managing Risk and  
Maximizing Investor  
Returns.

## **ABSTRACT**

Today's crypto industry face two major problems, one being the usability of the cryptocurrency and second being the complexity of investments and its returns. AWA COIN LLC brings to you a solution, which will not only solve the said problems, but will also bring a great deal more to the table. Most tokens though classified under "Utility Tokens" cannot be utilized at General Marketplaces or merchant sites. These tokens just stay in the wallets without earning any returns on it. Here is what AWA COIN has that the other "Utility Tokens" don't have - Consumer Power, Real Estate Redemption power and earning regular dividends through Crypto Guarantee Fund investing. Holder of the AWA COIN would be able to use it to buy everything from luxury to every day needs. This token would be redeemable at consumer stores, merchant stores, merchant sites and major e-commerce sites. AWA COINs would also be redeemable in real estate in various commercial and residential projects in India at values that are much lower than the market rate at that moment. The AWA token would also earn regular dividends to its holders. The fund managers at AWA COIN LLC would be investing in Crypto Guarantee Funds and other popular indices using various principles of investments, market conditions, ensuring safe ROIs. In the sections that follow, the whitepaper will discuss each of the problems, its solutions and use-case in details. The distribution, pricing, and availability of the tokens will also be discussed in detail.

## CRYPTOCURRENCY

A crypto currency is a digital or virtual currency that uses cryptography for security. A defining feature of a crypto currency, and arguably its most endearing allure, is its organic nature; it is not issued by any central authority, rendering it theoretically immune to government interference or manipulation. Taxonomy for crypto currencies – Traditionally, crypto currencies are classified as Coins, Tokens and Securities.

A different classification with examples will help make sense of the thousands of coins that already exist in the market and are coming up.

cryptocurrencies are decentralized digital currencies enabling secure, peer-to-peer transactions without intermediaries. Using block-chain technology, they ensure transparency and security. Cryptocurrencies provide financial services to the unbanked and offer a hedge against financial system vulnerabilities and inflation.

The original purpose of crypto currencies was to create a universal decentralized currency. Bitcoin was the first of its kind. Other currencies include Binance Coin (BNB)

TRON (TRX)

Monero (XMR)

RIPLE (XRP)

Dash (DASH) etc

**BINANCE**

**TRON**

**MONERO(XMR)**

## HISTORY OF CRYPTOCURRENCIES

PRE- BITCOIN ERA SINCE 1990s

THE BITCOIN ERA 2008 ONWARDS

JAN 2009 GENESIS BLOCK

MAY 2010 FIRST PIZZA PURCHASED WITH BITCOIN

FEB 2011 BITCOIN TRADED AT \$1

2011 BIRTH OF NEW CRYPTOCURRENCIES

YEAR 2012 BOOM IN ALT COINS

NOV 2013 BITCOIN SPIKES TO \$1200

MARCH 2024 BITCOIN TOUCHES HIGHEST LEVEL

**JUNE 2024 BIRTH OF AWA COIN**

## **PROOF OF WORK IN BITCOIN**

Satoshi Nakamoto (the inventor of block chain) in his article 'Bitcoin: A Peer-to-Peer Electronic Cash System' explained that proof-of-work system is needed to implement a distributed timestamp server on a peer-to-peer basis.

In Bitcoin, proof of work is implemented by incrementing a nonce in the block until a value is found that gives the block's hash the required zero bits.

Every transaction has to have a unique incrementing nonce. The first transaction has to have nonce = 1, second nonce = 2, third nonce = 3 and so forth. The reason this is done so is to prevent replay attacks. Once the CPU effort has been expended to make it satisfy the proof-of-work, the block cannot be changed without redoing the work. As later blocks are chained after it, the work to change the block would include redoing all the blocks after it.

## **PROOF OF WORK IN ETHEREUM**

In existing proof of work (POW) algorithm like in Bitcoin, a small group of hardware companies or mining operations acquire a disproportionately large amount of power to impact or manipulate the network. Usage of ASICs, specialized chips specifically designed to outperform standardized computer hardware by many orders of magnitude in hashing performance is being used to solve the computation and mint more coins. Bitcoin's mining system has always been heavily centralized, because Bitcoin miners are just grabbing block headers from places like GHASH.io and just mining on them without even thinking about their mining.

In Ethereum, the team decided to use mining algorithm that helps fight against mining centralization. Originally, they considered memory hard ideas like Dagger. The process of having decentralized mining is followed to make it more difficult to create ASIC's chips for it. As it turns out, Dagger is great mathematically, but it is not all-that great when miners have GPU's with shared memory. So, further they moved to different Proof of stake ideas, but it is yet to be implemented.

**AWA COIN**  
A REAL ESTATE CRYPTO

## **CRYPTO GUARANTEE FUNDS**

Crypto Guarantee Funds are alternative investments using pooled funds that employ numerous different strategies to earn active return, or alpha, for their investors

A Content Crypto Guarantee Fund is designed to protect investors and users in the cryptocurrency market against losses due to fraud, hacking, or other malicious activities. This fund pools resources from participating stakeholders and allocates them to cover verified claims of financial loss. By providing a safety net, it enhances trust and stability in the crypto ecosystem, encouraging wider adoption. The fund operates transparently, with regular audits and clear guidelines on claim eligibility and disbursement procedures.

AWA COIN provides an easy access to a well-managed and diversified Crypto Guarantee Fund. AWA COIN LLC experienced fund-managers recognize the risks, complexity, and economics of the investment ecosystem. The managers pro-actively take steps to mitigate the risks by studying the market conditions. The managers employ different strategies ensuring the right investment and high returns.

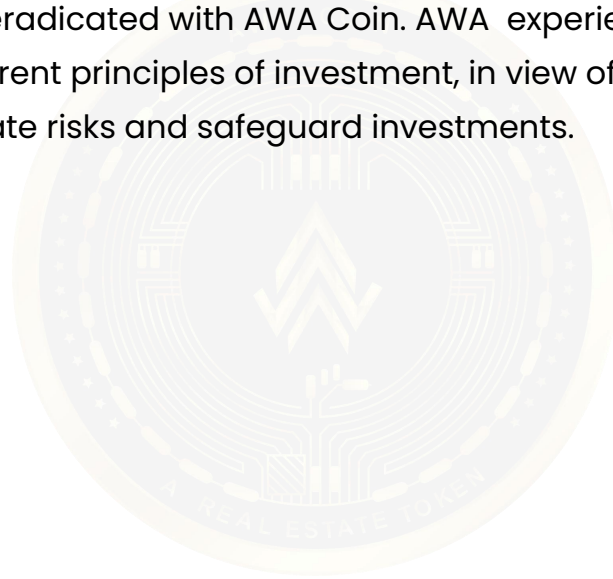

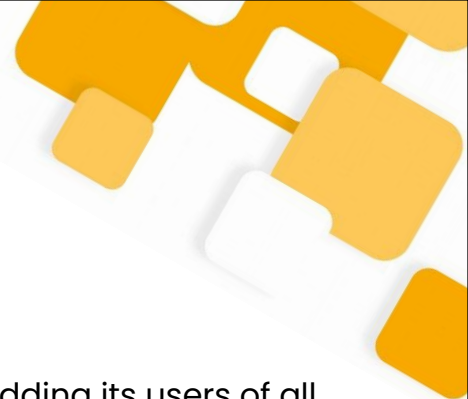

**AWA COIN**  
A REAL ESTATE CRYPTO

## **VALUE PROPOSITION**

Token Holders – The AWA Token is the ultimate utility token. The users will be able to use this token across various platforms. From availing daily needs and services to purchasing goods and services of luxury, the AWA Token will empower its users. The users will be able to avail these services at discounted prices.

The complicated matrices of investing and the after worries of losing the investment will be eradicated with AWA Coin. AWA experienced fund managers use different principles of investment, in view of the market conditions to mitigate risks and safeguard investments.

## THE AWA TOKEN

AWA COIN LLC 's Platform is created with the purpose of ridding its users of all the hassles of dealing with the insecurities of crypto currencies and making the process seamless. Instead of working on the concept of demand and supply, AWA platform works on the principles of redemption. The AWA Token is a Premine token that would be deployed on the BEP20 block chain.

**The AWA Token will be the ultimate utility token The investor/ consumer/ user will be able to Redeem the token value through**

- Real Estate in India.
- Market places both online and offline.
- Earn regular dividend through investments in Crypto Guarantee Fund.
- Will be able to trade the tokens on various exchanges.

## **REAL ESTATE POWER**

Real estate is one of the most important sectors of the economy. The real estate sector comprises four sub sectors - housing, retail, hospitality, and commercial. The growth in the real estate sector is in sync with growth in the corporate environment, demand for office spaces, urban and semi-urban accommodations. Real estate is considered real property that includes land and anything permanently attached to it or built on it, whether natural or man-made. The real estate market in India is expected to become a US \$477 Billion industry in the coming two years. The real estate market is also expected to grow at a CAGR of 19.2% in the FY 2022 – 2042

**Reports suggest that changes in the real estate landscape will substantially impact the real estate investment community. These changes and impacts are -**

1. Globally the investable real estate will have grown by 85% in 2024 compared to 2012
2. The fast-growing cities in the growing economies will present a high risk/high reward opportunities
3. The key drivers to the real estate growth will be technology innovation and sustainability
4. Collaborating with the local governments to mitigate risks will become very important
5. Newly acquired wealth from the emerging economies will intensify the competition for prime assets

## ADOPTING BLOCKCHAIN TECHNOLOGY

Blockchain technology is an advanced database mechanism that allows transparent information sharing within a business network. A blockchain database stores data in blocks that are linked together in a chain. The data is chronologically consistent because you cannot delete or modify the chain without consensus from the network. As a result, you can use blockchain technology to create an unalterable or immutable ledger for tracking orders, payments, accounts, and other transactions. The system has built-in mechanisms that prevent unauthorized transaction entries and create consistency in the shared view of these transactions.

### **Proof-of-concept**

A utility token will be redeeming in virtual world as well as in the physical world.

AWA Token users can utilize their token for redeeming Real Estate assets, Buy physical assets from their mobile apps from our merchants and as a real time store value currency to transact from our tokens directly with other users

### **STRENGTHS (+)**

**Decentralization:** Removes the need for a central authority, enhancing security and trust.

**Security:** Uses advanced cryptographic techniques, making data extremely difficult to alter.

### **WEAKNESSES (-)**

**Scalability Issues:** Networks can become slow and expensive with increased transactions.

**Energy Consumption:** High computational power and energy use raise environmental concerns.

### **OPPORTUNITIES (+)**

**Financial Services:** Enables faster, cheaper, and more secure transactions, aiding financial inclusion.

**Smart Contracts:** Automates contract execution, streamlining processes and reducing costs.

### **THREATS (-)**

**Security Risks:** Vulnerable to attacks like 51% attacks that can alter the **blockchain**.

**Competition:** Increasing market saturation makes it hard for new entrants to stand out.

## **BINANCE BLOCKCHAIN**

Binance Blockchain refers to the network of blockchain technologies and platforms developed by Binance, a leading cryptocurrency exchange.

Every Transaction in our network will be based on BEP20 token, the standard rules apply to all BEP20 Tokens since these rules are required to interact with each other on the BEP20 network. These tokens are block chain assets that have value and can be sent and received, like Bitcoin, Litecoin, Ethereum, or any other crypto currency existing in the crypto sphe

### **BEP 20**

This type of signing technology is one of the most used ones. It uses miners or other calculating devices to proof that they have worked in order to get the allowance of signing blocks. This in general is a very good idea since nobody will work if they won't get rewarded.

The Binance network currently uses a planned proof of work (POS) based consensus algorithm called bep20. Other factors that promote mining centralization, such as handling of orphaned blocks, are tackled separately within the binance protocol. bep20 is a specifically designed CPU friendly and "ASIC-resistant" POS algorithm in bep20. It is going to be harder to make ASIC's, but probably not impossible. The binance team hopes to reduce economic incentives for mining centralization in binance, at least until a secure POS (Casper) algorithm can be designed and deployed.

## TOKEN DETAILS

<b>Token name</b>	AWA COIN
<b>Symbol</b>	AWA
<b>Token Supply</b>	1000 CR
<b>Technology</b>	BEP20

## Distribution of Tokens

- 35% for staking Reward
- 20% Marketing
- 10% For Airdrop Promotion
- 10% Development
- 5% For Charity
- 20% For Company Reserve/Lock

## **FUND ALLOCATION**

The largest part of the raised funds will be allocated to creating and investing in Crypto Guarantee Funds. AWA COIN LLC plans to return to their investors through regular or interim dividends earned through Crypto Guarantee Funds. The second largest part of the fund will be allocated to Marketing, Distribution and operational costs of the project. The third chunk of the funds will be allocated to acquiring real estate projects which will be redeemable by the token holders. AWA COIN LLC believes in working as a team and rewarding those who have contributed to the Success of the project. A specific amount will be reserved for our team of Advisors and Fund Managers. Funds will be allocated to Research and development for growth and development of Crypto Guarantee Funds.

## ROADMAP

With help from our teams, contributors and investors these are the milestones we are looking forward to achieve.

**June - 2024**

AWA COIN LLC is formed and officially takes control of the AWA Token project.

ITO opens and is set to run until 31 DECEMBER 2024. AWA Priced at \$1.00 (USD).

**1<sup>st</sup> July - 2024**

**1<sup>st</sup> January - 2025**

AWA's wallet manager officially launched and Android app released in 20 languages.

Token Redeemed Through Our E - Commerce Web site.

**February - 2025**

**31<sup>th</sup> March - 2025**

Own exchange+(top 10 global exchange) confirm will be listing AWA Token ASAP.
